About Enzen (www.enzen.com)

Enzen Global Solutions Pvt. Ltd. (Enzen) is a Business Consulting, Solutions and Product Engineering organization focused on Energy and Utilities. Enzen was founded in 2006 by a team of very senior industry experts with rich experience in advanced markets in Europe & the United States. Enzen aims at increasing operational and financial efficiencies across enterprises by leveraging an optimal mix of deep domain knowledge, expertise in Business and Solution architecture with strong programme management capabilities. Enzen is a high-end strategy consulting company, run by a team of Knowledge Practitioners with a firm belief in sustaining trusted partnership with its business allies and in value creation for its customers.

Enzen's core team consists of mature professionals with strong domain knowledge and technical expertise supported by a proven & competent delivery engine. Enzen consultants have successfully implemented large programs for some of the most mature de-regulated markets in the world. Enzenites believe the key attributes of success revolves around the ability to forge lasting partnerships with customers, the capability to capture and understand customers concerns and to deliver value based end-to-end solutions to customer's satisfaction. Enzen Global has five major business streams, viz., **Power, Gas, Water, Environment and Renewable Energy in India, the UK, Australia and Europe.**

As an energy consultant, you will be working in a multi-disciplinary team and report to the renewable and energy management practice head. The energy consultant's responsibilities include conducting energy assessment, suggesting ways to reduce energy and carbon footprints, identifying alternative renewable energy opportunities and recommending solutions for energy and environment management. To be successful as an energy consultant, you should be able to demonstrate excellent analytical, problem-solving, and good communication skills.

Energy Consultant Responsibilities:

- Conducting feasibility studies and preparing concise reports on research results
- Identifying and evaluating viable options to reduce companies' energy consumption
- Conducting market research, preparation of project proposals, DPRs, interaction with clients and vendors related to Solar PV.
- Tender/Bid process management in Solar PV (Floating solar, Roof top solar or Utility Scale).
- Design and development of Policy and Regulatory Framework for deployment of solar power projects.
- Advisory support to state level entities and agencies for program design/development and implementation support for Floating solar PV, Roof top Solar PV projects, Solar Parks etc.
- Developing detailed engineering design and drawings
- Educating clients on alternative energy resources

Qualifications and Experience:

Master's degree in renewable energy, environmental engineering, energy management, or related field.

Minimum of 2 year experience working as an energy consultant.

Certified Energy Auditor (CEA) or Certified Energy Manager (CEM) accreditation is advantageous.

To apply, please submit your resume and a cover letter detailing your relevant experience and qualifications to **talent.egsindia@enzen.com**
