

Enzen begins major new partnership to accelerate Portugal's transition to net zero

The agreement with Greenpower Europa will see investment in new solar PV solutions at up to 100 sites across Portugal

Lisbon, 17 May 2022. Enzen, the global knowledge enterprise specialising in energy and water, has finalised an ambitious new renewable energy investment partnership to accelerate Portugal's transition to a net zero future.

The utilities specialist, in collaboration with Greenpower Europa RAIF (Reserved Alternative Fund) and supported by Martinez-Echevarria Ferreira and Rivera law firm, has secured a multi-million euro deal to invest in distributed generation solar projects over the next two years.

The agreement will see new solar PV solutions at up to 100 sites across Portugal, contributing to the country's net zero future and its transition to a greener economy.

The solutions, which will be a combination of ground and rooftop solar PV, are aimed at industrial and commercial customers looking for self-generated ways to increase energy efficiency, reduce costs, lower emissions and prepare for the energy transition.

Drawing on Enzen's deep domain knowledge in renewables, the new 360° turnkey solutions encompass development, licencing, construction and then a 15-year period of asset management to ensure maximum efficiency and value for customers.

Miguel Saramago, Global Head of Distributed Generation at Enzen, said: "As commercial and industrial organisations across Portugal seek to lower emissions in a way that's sustainable and profitable, solar provides an excellent opportunity to become more self-sufficient, reduce dependency on grid energy and minimise risk from price volatility. We are delighted to be part of this exciting new opportunity and to play our part in Portugal's decarbonisation journey."

Luis Centeno, CEO of Greenpower Europa, said: "This exciting new project will help drive the expansion of renewables solutions across Portugal and support the country's energy transition. Enzen is offering specialist utilities knowledge and a best practice 360° solution that complies to our high standards across commercial, financial and

technical dimensions. We're looking forward to working with the team and delivering value for customers and all stakeholders involved.”

Already a transformative player in the utilities sector in the UK, Spain, Turkey, India and Australia, Enzen launched its Portugal operation in May 2021. Based in Lisbon, Enzen Portugal’s vision is to accelerate the country’s decarbonisation agenda by harnessing its huge renewable potential, deploying innovative distributed generation solutions that can be replicated across the wider Iberian market.

About Enzen

Enzen is a global, professional, knowledge enterprise that focuses on gaining, refining and sharing expertise in the energy and utility sector. It provides strategic advisory and execution of outcome-driven solutions to over 250+ leading businesses, governments, non-governmental organisations, and not-for-profits.

Enzen aspires to make energy and water accessible, affordable and sustainable for all through innovative models, technology and applications. We work with customers across the value chain to deliver sustainable and lasting improvements to their efficiency and performance, increasing their value to their customers and owners.

Our goal is to support large consumers of energy and water and improve the sustainability of resources by increasing efficiency and optimising existing operations. Besides this, we develop the commercially successful use of renewable resources to deliver a transformative advantage for our customers.

Enzen is unique in providing a wide range of strategic advisory, engineering services and solutions from end-to-end for the power, water, gas and renewable energy sectors, supported by our specialised and unique Centres of Excellence. It’s this focus on sector expertise, experience, insights and learning that means we define our employees as ‘knowledge practitioners’.

Our expertise practised-knowledge and implementation delivery cover transformation, technology optimisation, smart utility networks, operations, capital efficiency, asset management and mergers and acquisitions, amongst other areas, and helps to deliver high-quality, effective, need-specific solutions.

The business, founded in 2006, has grown to over 4,000 knowledge practitioners and developed across the globe. Enzen now has a presence in Australia, Africa, India, Portugal, Spain, Turkey, the UK and the US and is working on projects in more than 44 countries.

We pride ourselves on innovation, and partner with academia from leading universities as well as think tanks and policy advocates to enable our global network of knowledge practitioners deliver maximum value for our customers consistently.
